

## PRISM Prostate Biomarker Study – Information for Potential Participants

### INTRODUCTION

- This flier contains information about a research study that you may be eligible to participate in. If you are interested, you will have the opportunity to learn more and ask questions. Participating in any research is always your decision.

### STUDY SUMMARY

**Background:** You may be eligible for this research study if you are being scheduled for a prostate biopsy. This study is to develop a diagnostic test that may improve the diagnostic process for prostate cancer and help patients to avoid unnecessary biopsies in the future. The study aims to evaluate semen samples to learn about biomarkers.

**Informed Consent and Data:** There is a single visit for the informed consent discussion which can be completed remotely. You will learn more about study details and have the opportunity to ask questions. If you choose to consent, the study team will collect data from your medical record about medical conditions, medications, and outcomes of your biopsy.

**Study Sample:** If you choose to participate, you will receive a kit mailed to your house so you can collect a semen sample AT HOME and ship it to the research team PRIOR to your scheduled biopsy.

**Payment:** Once the lab receives your sample, you will receive a stipend for participation.

### NEXT STEPS

- A research staff member may reach out to you to talk about this study. If you are interested and would like to learn more about participating, please reach out to:
